Boxed In

**Math Concept:** Multiplication

**Materials:** 2 dice, gameboard, 2 different crayons or colored pencils

**Directions:** This is a 2-player game. Each player rolls both dice, and draws a matching array on the gameboard, and writes the multiplication sentence in the array. Play continues until one player can’t fit their array on the board. The last player to put their array on the board is the winner.

For example, if a player rolls a 4 and a 5 they would mark the gameboard as shown below.
