Who’s In Between?

Math Concept: Putting numbers in order
Materials: Game board, one or more dice per player, paper for recording score
Directions: This game is for 3 players. Each player rolls one or more dice to create a number. All players show their number simultaneously and place in order from least to greatest in the boxes below. The player whose number is “in between” must complete the sentence below to earn the point. The object of the game is to score the most points.

______ is between _____ and _____
because__________________.
